

Teyiba Aman

Software Engineer

Addis Ababa, Ethiopia | teyibaaman68@gmail.com | +251952048152 | [Linkedin](#) | [Github](#) | [Portfolio](#)

SUMMARY

A software engineer with hands-on experience creating full-stack web applications, including secure backend systems and interactive frontends. Proven ability to build maintainable, scalable solutions using modern frameworks and databases, with a strong focus on clean architecture, performance, and user experience. competent at working in groups and converting practical issues into useful software solutions.

EDUCATION

Addis Ababa University

Feb 2023– Jun 2027 | Addis Ababa, Ethiopia

BSc in Software Engineering (Software Stream)

- Relevant Courseworks: DSA, OOP, Database Systems, Operating Systems, Computer Architecture and Organization, Web and Mobile Development, AI and Machine Learning, Networking, Distributed system.

PROFESSIONAL EXPERIENCE

Front End Development Internship

Mar 2024 – Jun 2024 | Addis Ababa, Ethiopia

Nile Technologies

- Enhanced frontend development skills by building Dashboard Web App, an interactive data visualization platform.
- Applied powerful front end technologies like React and Tailwind CSS, achieving over 95% positive feedback from users.
- Adapted Clean Architecture principles to enhance code maintainability and testability during internship

PROJECTS

“Evangadi Forum”

sep 2025 – oct 2025

- Developed a full-stack Q&A forum where users can register, log in, post questions, and answer community question
- Built a secure REST API using Express, MySQL, and JWT authentication to protect routes and user data
- Implemented relational database design with users, questions, and answers, ensuring data integrity and scalability.

“Habasha-Restaurant”

Dec 2024 – Jan 2025

- Worked collaboratively with a team to build a responsive frontend for a Habasha restaurant web application.
- Fetches data from the backend API to display real-time menu items, order details, and status updates

“SaveHeaven”

Jan 2025 – mar 2025

- Built the frontend of a support and reporting web application for individuals affected by gender-based violence.
- Designed responsive, accessible, and empathetic UI components to ensure a safe and user-friendly experience.

“SafeNet”

Dec 2025 – Dec 2025

- Built backend logic and browser extension for SafeNet, enabling real-time detection and prevention of online abuse.

SKILLS

Programming Languages

Python, JavaScript, TypeScript

Soft Skills

Growth Mindset, Persistence, Teamwork, Collaboration, Communication

Frameworks & Libraries

Node.js, React.js, Express.js, Tailwind CSS

Version Control & Project Management

Git, Github, Trello, Jira

Databases

PostgreSQL, MySQL, MongoDB

Languages

English(fluent) , Afan Oromo(native), Amharic(native), Arabic

ACHIEVEMENTS

Secured **3rd** place among 85 participants and 27 projects during the 16 Days of Activism Against Gender-Based Violence (GBV) Hackathon, organized by ELiDA with the “SafeNet” Project.
